Project Design Phase-I
Problem – Solution Fit Template

Date	19 September 2022
Team ID	
Project Name	FORMULA 1 Race Intelligence Dashboard Analysis Report (2010-2026)
Maximum Marks	2 Marks

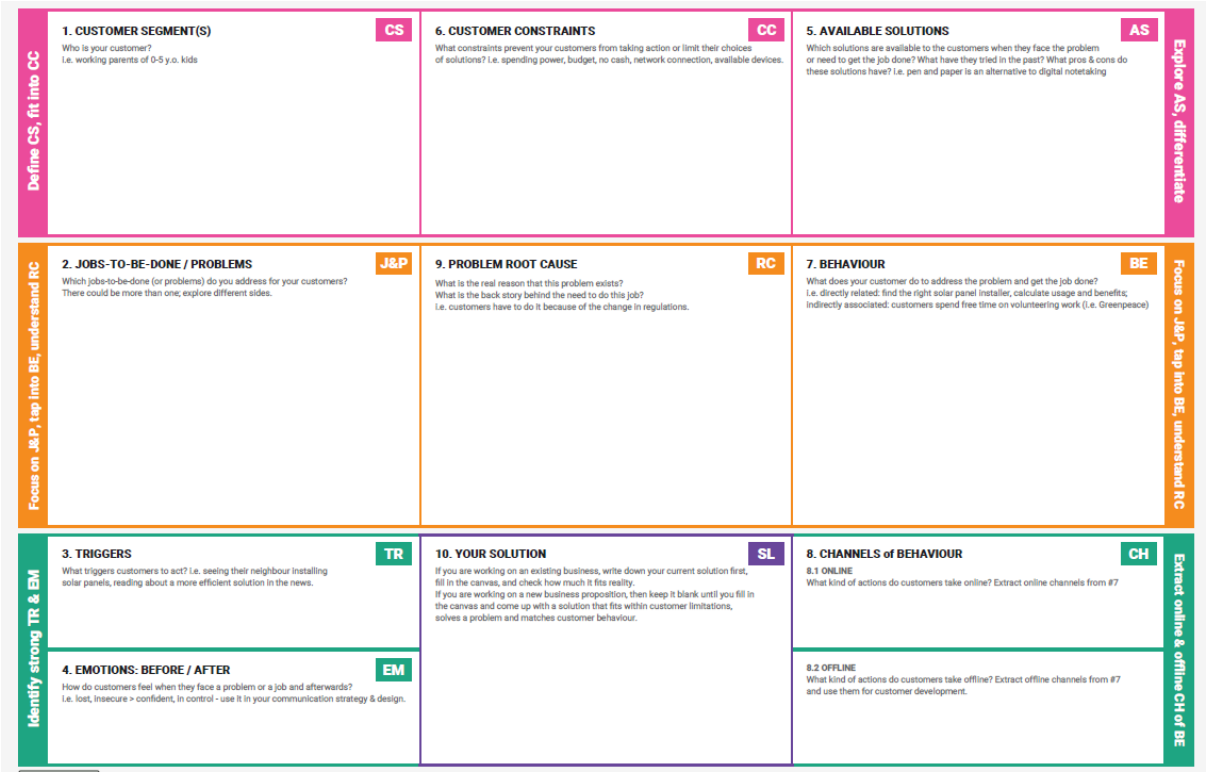

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ❑ Solve complex problems in a way that fits the state of your customers.
- ❑ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ❑ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ❑ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ❑ **Understand the existing situation in order to improve it for your target group.**

Problem–Solution Fit: Formula 1 Analytics

Customer segments: team strategists, broadcast analysts, technical/reliability analysts, students and motorsport followers.

Jobs to be done: compare driver/team performance, explain tyre usage and podiums, inspect DNF patterns, and communicate evidence through an interactive story.

Current alternatives: manually inspecting spreadsheets or static tables. These are slower to compare across seasons and may hide missing data or grain differences.

Proposed fit: a Tableau workbook with linked sheets, transparent KPI definitions, season/team/driver filters and a story that distinguishes supported findings from limitations.

Success criteria: source totals reconcile; filters behave consistently; every chart has a clear question; missing fields are disclosed; no unsupported nationality or causal claims are made.
