Ideation Phase
Empathize & Discover

Date	31 January 2026
Team ID	
Project Name	FORMULA 1 Race Intelligence Dashboard Analysis Report (2010-2026)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map — Formula 1 Data Analyst

SAYS: “I need to compare drivers, teams and reliability across seasons without manually checking multiple sheets.”

THINKS: “Are the totals comparable, and are missing values or joins changing the results?”

DOES: Filters by season/team, checks points and DNF counts, compares tyre compounds and reviews circuit context.

FEELS: Confident when metrics are traceable; frustrated when charts use different grains or unsupported assumptions.

PAINS: Multiple sheets, missing DNF reasons, no nationality field, and the risk of confusing driver-result rows with race events.

GAINS: One interactive dashboard, documented KPI definitions, visible filters and a narrative story grounded in the workbook.
